Animal Welfare Statement

The use of laboratory animals in any research must be conducted according to the ethical principles governing the use of animals in scientific investigations. Therefore, authors are required to confirm their responsibility for ensuring compliance with these ethical standards. The following guidelines are based on the National Committee for Research Ethics in Science and Technology (NETNT).

Guidelines:

- Respect animal dignity.
- Responsibility for considering alternatives (Replace).
- The principle of proportionality: responsibility for balancing suffering and benefit.
- Responsibility for reducing the number of animals used (Reduce).
- Responsibility for minimizing risk and improving animal welfare.
- Responsibility for maintaining biological diversity.
- Responsibility when intervening in a habitat.
- Responsibility for openness and sharing of data and materials.
- Requirement for expertise in animal handling.
- Requirement for due care.
